SIGNIFICANT PROJECTS

We are experts in all kinds of software design and development. We strive to reshape your strategies into software systems and technology processes that are assured to optimize your requirements. Following are some of the projects we are proud to introduce to you

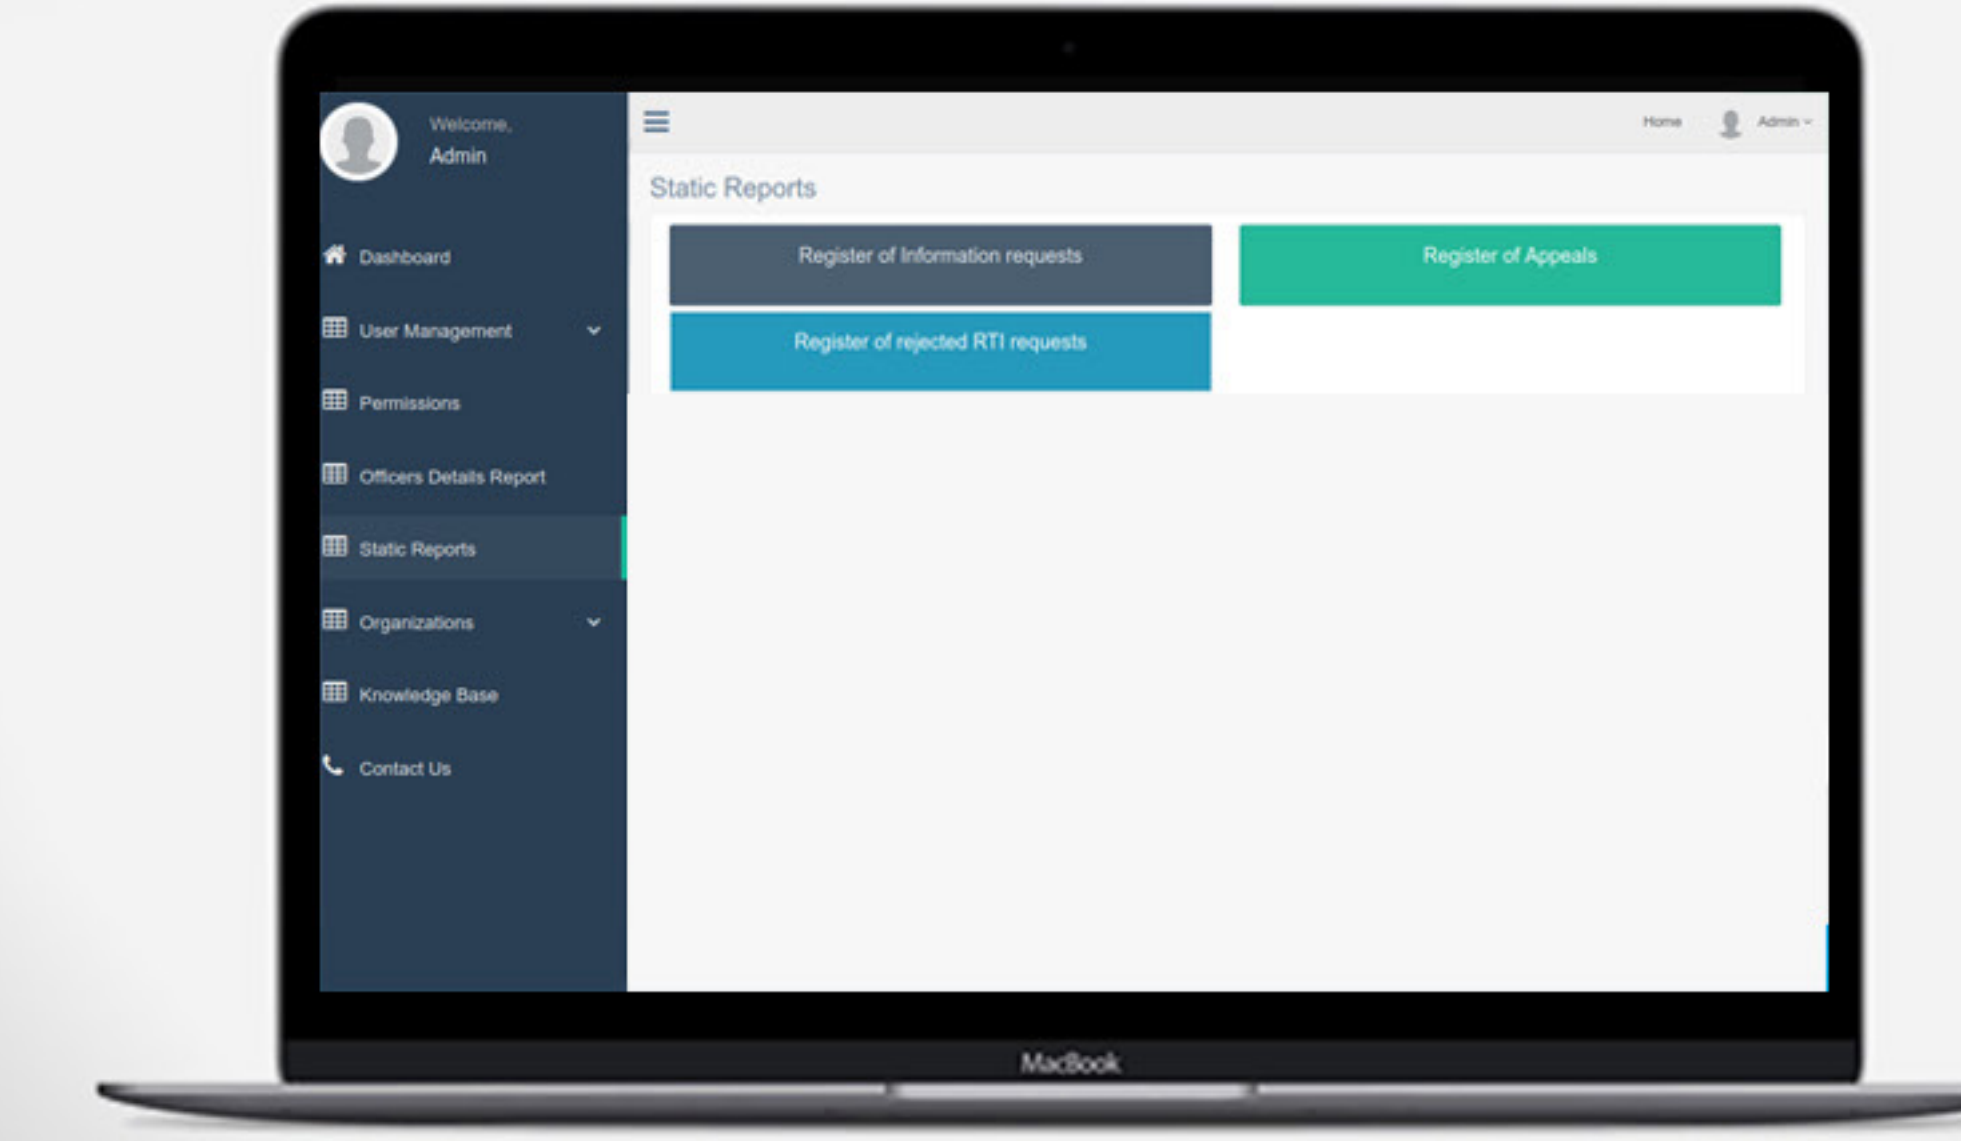

Management Information System for the Institution of Engineers Sri Lanka (IESL)

An enterprise application with corporate website, web application and mobile application for automating member related services which accommodates 15,000+ members within the institution.

Project Planning and Monitoring Tool for Primary Healthcare System Strengthening Project (PSSP)

The project development objective is to increase the utilization and quality of primary health care services, with an emphasis on the detection and management of non-communicable diseases in high-risk population groups, in selected areas of the country. Project Monitoring Tool was designed and developed as a centralized information repository and mainly to monitor and evaluation purposes.

Right to Information (RTI) Requests Tracking And Monitoring System

The Right to Information (RTI) law has a major impact for the government and citizens. Under the scope of this project, it was expected to develop an online tracking system for Right to Information (RTI) requests to allow two-way communication between the general public and the information officer (IO) of government organizations.

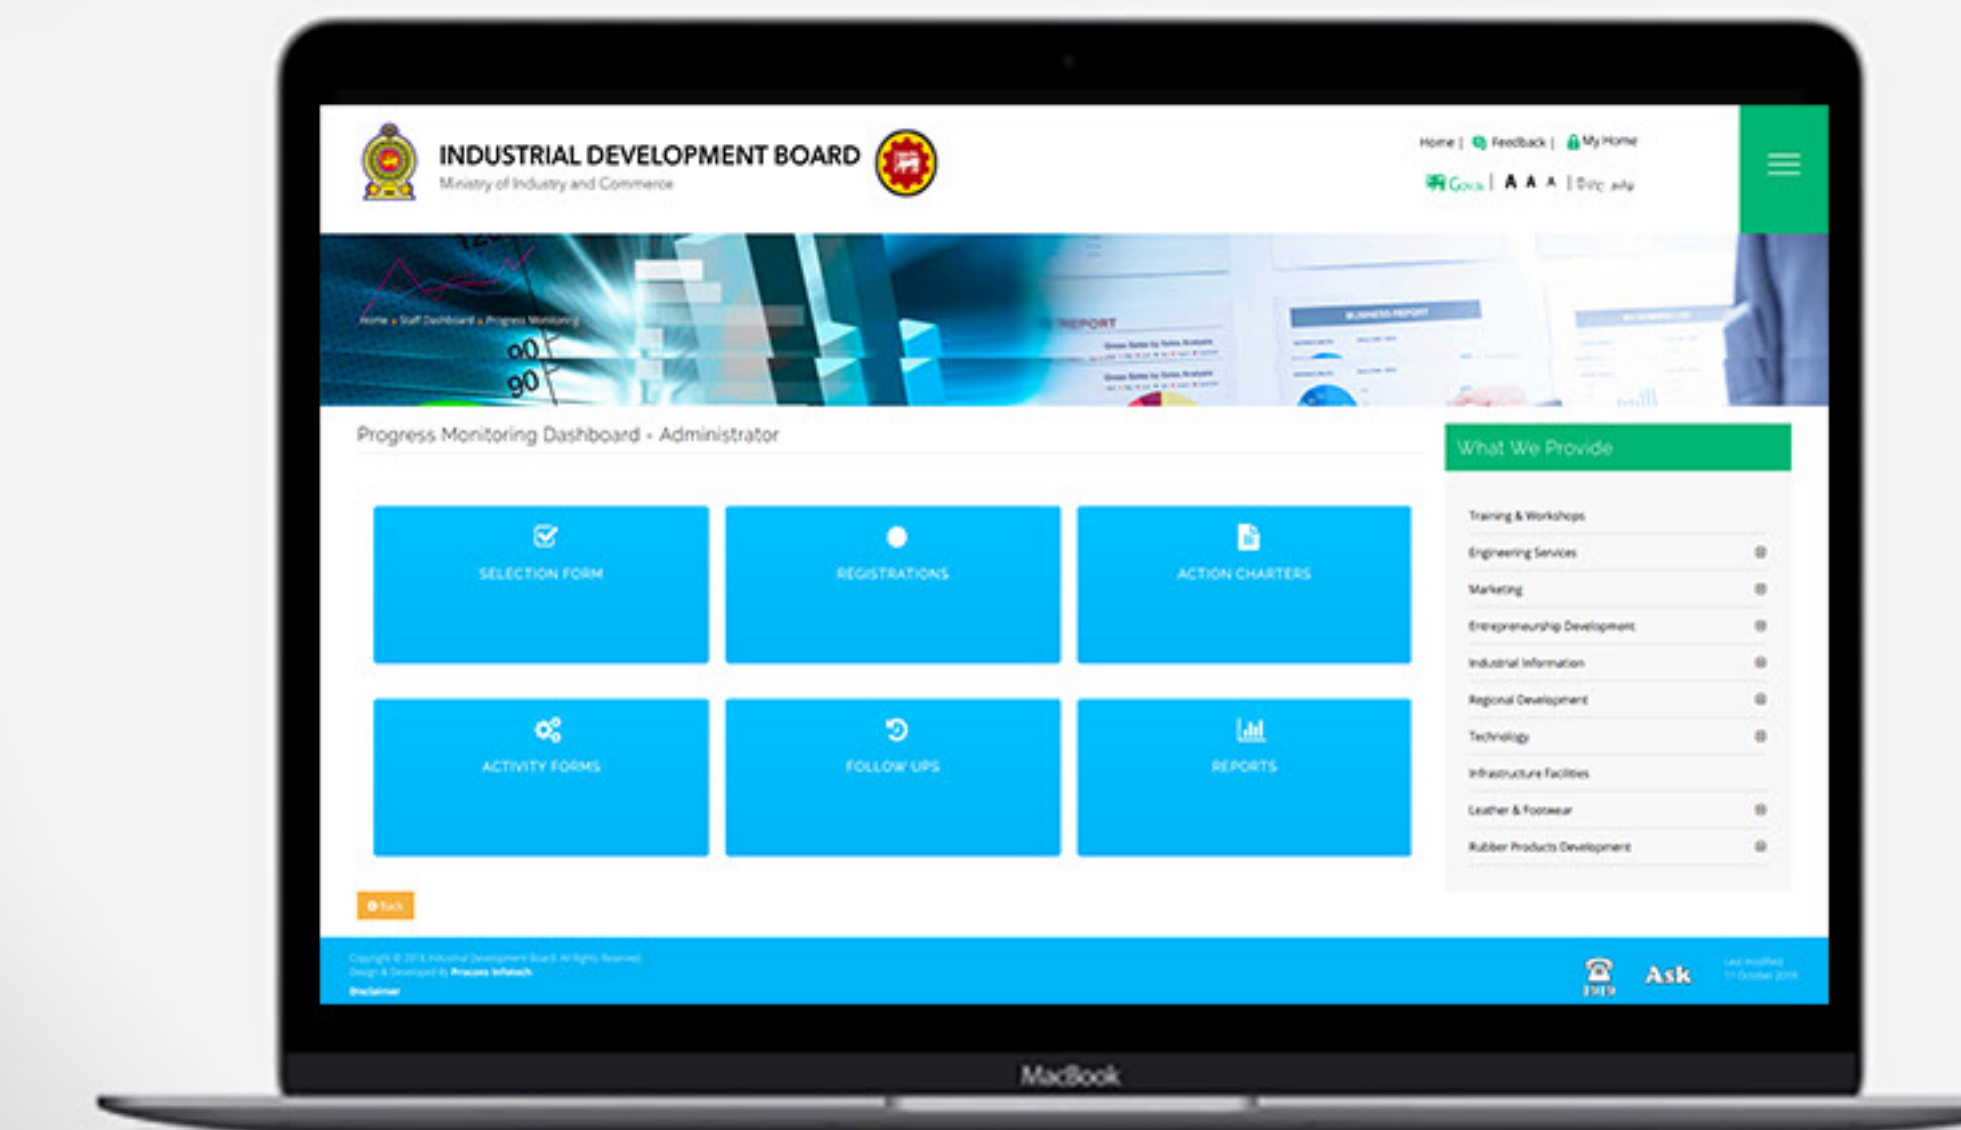

Mobile Application and Web platform for the 53 rd Conference of the Director General of Civil Aviation, Asia and Pacific Region

This system and mobile application was developed to plan, notify, track and to engage the members of the conference. The app facilitates members to register, request, update and notify information on accommodation, venue, agenda, partner, hotels etc. An interactive map was also integrated to find the participants, location according to accommodation category.

Government Information Centre Web Portal

A web platform to connect all the government organizations. The e-services provided by the government organizations are linked with this web portal to provide one place to access all necessary services. currently there are more than 197 government organizations are connected within the portal.

Online Progress Monitoring System for Industrial Development Board (IDB)

This web based application provide facility to record and monitor progress of industries around the country where IDB provide services district wise. Field officer's performance monitoring facility also built-in with this solution.
